FRONT VIEW

When an overhead sign structure is located such that the sign post falls on a bridge, the sign support will be shown with the Structure Plans.

When an overhead sign structure is located such that it requires being attached to a retaining or sound wall, the sign support will be shown on the Special Design Signs sheets.

A bridge mounted sign is mounted on the outside of a bridge and faces traffic passing under the bridge structure.
Requests for sign mounting details are initiated by the District Traffic departments and are routed to Office of Design and Technical Services, Special Designs Branch.

Requests for bridge mounted signs should include the following:

- Sign size
- Location of the mounted sign
- Type of sign panel to be mounted (e.g., Laminated Panel Type A, Removable Sign Panel Frame, etc.)
- Lighting and walkway requirements
- Skew requirement (skewed bridge mounted sign will need special details)

THIS EXAMPLE IS ONE OF MANY EXAMPLES OF THE VARIOUS TYPES OF PROJECT PLAN SHEETS FROM THE SAME CONSTRUCTION PROJECT, "ROUTE 65 BYPASS PROJECT."

THE CONTRACTOR SHALL VERIFY ALL CONTROLLING FIELD DIMENSIONS BEFORE ORDERING OR FABRICATING ANY MATERIAL.

This statement is to be placed in the lower left corner of the sheet.
