

## Cone Zone Life Savers:

1.

Don't tailgate.  
When collisions happen, they happen in the blink of an eye.

2.

Pay extra attention. Focus.  
Know what's going on all around you.

3.

No cell phone. Major interruption.  
Big mistake. No call is worth it.

4.

Volume down.  
Take a second to turn the music down.

# THE CONE ZONE...

## Live to tell about it.

Many good drivers don't realize how dangerous a cone zone can be. People's lives are at risk. When you see the orange cones in a highway work zone, think of it as a signal to slow down and concentrate. It will only cost you a couple of seconds...but it just might mean the difference between life and death. Yours.
