24'-0"		3'-0"		

* Signs longer than 24'-0" are fabricated and mounted as adjoining single panels. The location of the vertical splice line will be determined by the Engineer.

SINGLE BEAM OR ARM SERIES

DOUBLE BEAM OR ARM SERIES

END ARM DETAIL SINGLE POST SIGNS

SECTION K-K

NOTES:

- The location of the horizontal splice line is dependent on the sign panel manufacturer for signs greater than 5'-0" in depth. Mounting bolts and clamps are required on each of the horizontal splice line at each support beam.
- Position sign panel so that mounting beams will clear truss connections and arm to post joints. Where interference cannot be avoided, 1/2" holes to pass the 3/8" U-bolts may be drilled through mast arm angles or truss connection members as necessary.
- Torque stainless steel sign panel mounting bolts to 9 foot-pounds.
- 1'-0" for Type C-1 and C-2. Others, 4".
- A stop plate is required at each mounting beam under sign panel.
