Attn: Mr. Felizardo Bagcus

Dear Mr. Bagcus,

I have reviewed your plans for improvement work at the Descanso maintenance station at 24171 Japatul Valley Road in Alpine. Under current conditions, water in the amounts described in your letter and for the time period requested should be available from Pine Valley Mutual Water Company under current conditions.

Based on the estimated 350,000 gallons for a period of 60 work days your costs from Pine Valley Water should be as follows:

350,000 gallons = \$2,340.00

Hydrant meter rental = \$400.00

The Company would require a deposit of \$5,000.00 to secure the return of the hydrant meter and pay for the estimated water and rental costs. Upon return of the hydrant meter in good condition, expenses would be deducted from the deposit and a refund made from the balance.

Should you have any further questions, please don't hesitate to contact me.

Sincerely,

Philip "Flip" Boerman  
Manager
